

Meer Ahmad

AI & Workflow Automation Engineer (n8n + AI Tools)

📞 +92 325 5394480 | 📩 meersharp786@gmail.com | 🌐 LinkedIn: Meer Ahmed | 🖥 GitHub: meerkhan407

PROFILE SUMMARY

AI & Workflow Automation Engineer specializing in designing, optimizing, and deploying intelligent workflow systems using n8n, APIs, and AI tools.

Experienced in integrating automation across Gmail, Slack, Notion, and databases to streamline communication, reporting, and analytics.

Proficient in Python scripting, API integration, and AI-driven process optimization. Passionate about creating scalable automation solutions that improve productivity, reduce manual workload, and support data-informed business decisions.

CORE COMPETENCIES

Workflow Automation | API Integration & AI Agents | Data Reporting & Analytics | Problem Solving | Process Optimization | Cross-Functional Collaboration

EDUCATION

Bachelor of Science (BS) in Computer Science — National University of Technology (NUTECH), Pakistan | *Expected 2026*

Key Coursework: Artificial Intelligence, Machine Learning, Data Science, Automation, and Embedded Systems

PERSONAL PROJECTS

1. WhatsApp Message Automation Workflow (n8n)

Created an n8n automation that schedules weekly and monthly WhatsApp messages for multiple recipients via Twilio API.

Each contact receives individualized messages pulled from Google Sheets, improving communication and follow-up efficiency.

2. Email & CRM Sync Workflow (n8n)

Automated Gmail–Notion CRM–Google Sheets integration to log client communication, send follow-ups, and generate weekly status reports automatically.

3. AI Chat Assistant Workflow

Built a ChatGPT API-based automation using n8n to process customer queries and auto-reply through WhatsApp API, reducing response time by 70%.

4. Automated Reporting Dashboard

Designed a data pipeline using n8n and Python scripts to fetch analytics from SQL and Google Sheets, generate PDF/Excel reports, and email dashboards to stakeholders.

5. IoT Device Monitoring Automation

Integrated NodeMCU sensor data with a cloud dashboard and automated Telegram alerts via n8n when device parameters exceeded thresholds.

PROFESSIONAL EXPERIENCE

AI Automation Developer — Freelance Projects | Remote (2024 – Present)

- Built custom automations in n8n and Make (Integromat) for workflow efficiency and CRM integration.
- Integrated APIs for Slack, Gmail, and Google Sheets to streamline data flows and communications.
- Automated business reporting and analytics tasks for start-ups, reducing manual effort by 40%+.

IoT Systems Intern — PowerGo Project | NUTECH (2023 – 2024)

- Implemented RFID and motion-based power-saving automation.
- Integrated Firebase analytics and email alerts through API scripts for real-time monitoring.

TECHNICAL PROFICIENCIES

- **Automation Tools:** n8n, Make (Integromat), Zapier, ChatGPT API, REST APIs
- **Programming:** Python, JavaScript, Node.js
- **Databases & Cloud:** Google Cloud, Firebase, SQL
- **AI Frameworks:** OpenAI, Hugging Face, LangChain, AutoGPT, LlamaIndex
- **Productivity & Collaboration:** G-Suite, MS Office, Notion, Trello, Airtable
- **Version Control:** Git, GitHub
